DIAL=A=DESIGN™

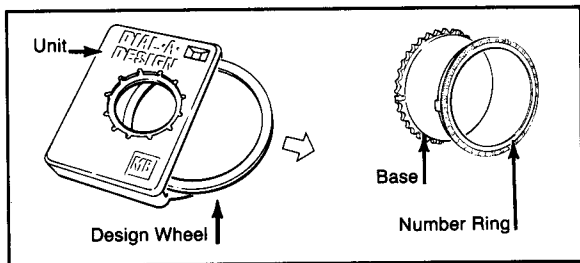

**Turn the page
and follow the
6 simple steps to
make this design.**

Contents: Dial-A-Design Unit, Design Wheel,
6 Different Design Disks, 1 Ball Point Pen,
4 Coloring Pencils, 24 Paper Circles, Circle
Template (to make more paper circles)

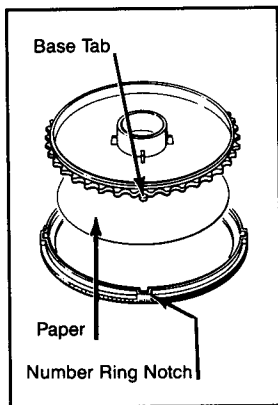

Step 1

Pull the Design Wheel from the Dial-A-Design Unit and lift off the Number Ring.

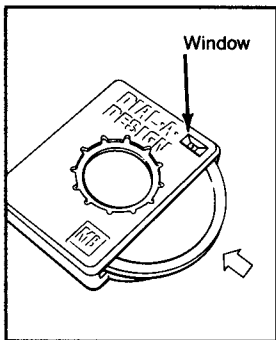

Step 2

Place the Number Ring on a flat surface, numbers-faced-down. Punch out a paper circle and insert it onto the inner rim of the ring. Line up the four tabs of the base with the four notches on the ring and press the base onto the ring to reassemble the Design Wheel.

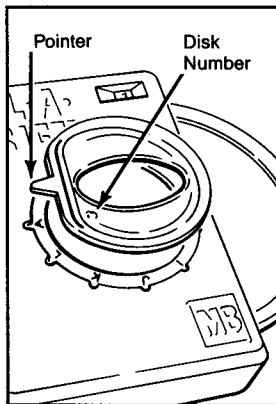

Step 3

Slide the loaded wheel into the unit until it's locked in. Turn the wheel so that the #1 appears in the window at the top of the unit.

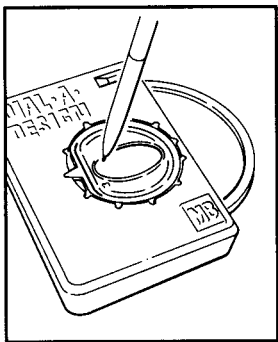

Step 4

Remove the six numbered Design Disks from the bag. Insert Design Disk 3 into the unit so that its pointer is in the "A" position and its disk number is FACEUP.

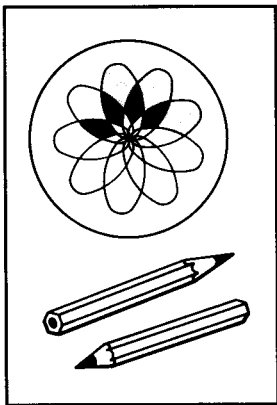

Step 5

Using the ball point pen, trace completely around the inner edge of the disk. Now, turn the Design Wheel four clicks so that the #5 appears in the window and trace again. Keep turning every 4 clicks and tracing until your pattern is complete.

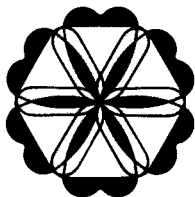

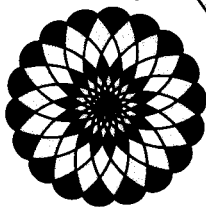

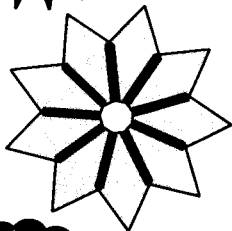

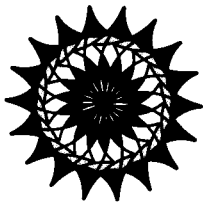

Step 6

When you finish tracing your design, pull the wheel from the unit. Lift off the Number Ring and remove the paper circle. Color in your pattern using the coloring pencils provided. Or use your own crayons, watercolors or markers.

More Design Tips:

- Turn the Design Wheel every one, two, three, four or more clicks when tracing to vary your patterns. For example, turning and tracing the wheel every one click will create a more intricate pattern.
- Just turn the disk to make a design. Or, turn the wheel and the disk.
- Use a combination of disks to form different patterns.

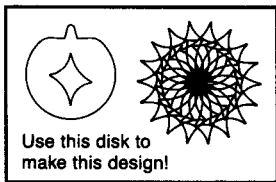

- You can use the designs you make for greeting cards, decorations, coasters and ornaments. Be creative!

Flip the page for 3 Fun Design Examples:

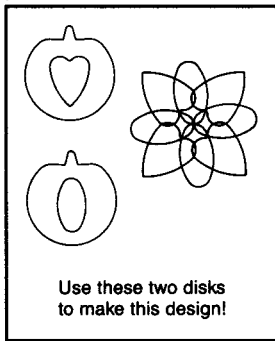

1. Just Turn The Wheel!

- Insert Design Disk 6 so that its pointer is in the "A" position.
- Set the Design Wheel at #1. Trace and turn the wheel two clicks to #3.
- Continue to trace and turn every two clicks until your pattern is complete.
- Remove and color.

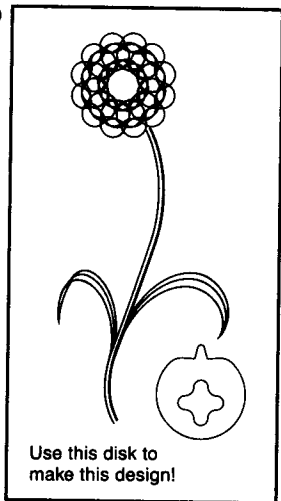

2. Two Disks Will Do It!

- Insert Design Disk 1 so its pointer is in the "G" position. Set the wheel at #1. Trace and then turn the wheel nine clicks to #10.
- Trace and turn the wheel every nine clicks until your pattern is complete.
- Remove Design Disk 1 and insert Design Disk 3 so that its pointer is in the "A" position.
- Set the wheel at #5. Trace and turn the wheel nine clicks to #14. Trace and turn to #23. Trace and turn to #32. Trace again.
- Remove and color.

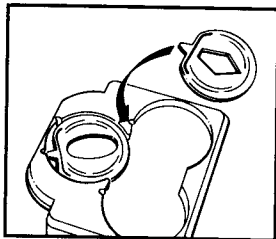

3. Make A Flower!

- Insert Design Disk 4 so its pointer is in the "A" position.
- Set the wheel at #1. Trace the pattern.
- Move the disk to the "B" position and trace again.
- Move and trace the disk in the C, D, E, F, G, H, I, J, K and L positions.
- Remove your design and draw in a stem and leaves.
- Color your flower.

It's Easy To Bring Along!

Just place two Design Disks (numbers-facedown) in each bin (located in the back of the unit) and fill the Number Ring with extra paper circles.

Round Up Some More Paper Circles!

Use the circle template provided to make more paper circles. Trace the outline of the hole onto paper. Then, cut out your circles.

Or We'd Be Glad To Send Them To You!

To order 96 more paper circles, just send your request along with your name, address and check or money order for \$2.50 to:

Milton Bradley Company
